

Setting up POP3 Mailboxes on your iPhone

To configure email accounts on an iPhone (version 1.0 and above) please follow these simple step-by-step instructions.

Step 1

Go to the 'settings' and select the option for 'Mail, Contacts, Calendars'

Under 'Accounts' select 'Add Account'

Step 2

From the 'Add Account' option select 'Other'

Step 3

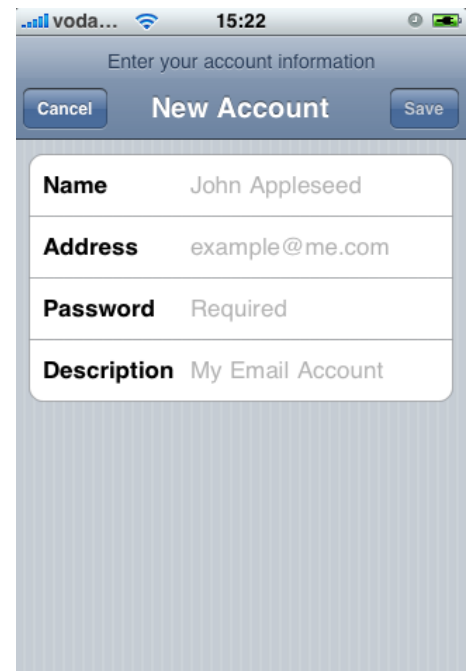

Enter the details for:

Name: (This is how you would like email recipients to see your name displayed: e.g. 'John Smith' or 'Support')

Address: (This is your full email address e.g. john@domain.com)

Password: (This is your mailbox password)

Click on the blue 'save' button.

Step 4

Select 'POP' at the top of the next page.

Enter the following details:

Host Name: mail.interdns.co.uk

Username: (This is your mailbox name e.g. john@account)

(Note: from July 2011 wysi clients may now use the **full email address** as the username if preferred.)

Outgoing Mail Server: smtp.interdns.co.uk

Username: (This is your mailbox name e.g. john@account)

Password: (This is your mailbox password)

Click on the blue 'save' button.

The screenshot shows a mobile application interface for creating a new account. At the top, it says "Enter your account information" and "New Account". There are "Cancel" and "Save" buttons. Below this, there are two tabs: "IMAP" and "POP", with "POP" selected. The form contains the following fields:

Name	My Name
Address	name@domain.com
Description	name@domain.com
Incoming Mail Server	
Host Name	mail.example.com
User Name	Required
Password	•••••

Step 5

If you are asked to connect without SSL select 'Yes'. The account settings will be verified and if successful the account details will be stored and your account listed on the following screen.

Step 6 - Finish

Your setup is now complete.
